

Installation and User Guide

fring version 3.36

For Nokia Mobile phones (Symbian 9)

About fring

fring is a mobile VoIP application that allows you to make mobile calls and send instant messages at no extra cost. fring calls **are free** ^[1] **and** leverage your handset's built-in mobile internet connection.

Hardware requirements

In order to use our Beta version, you will need:

- A Nokia 3G/WiFi handset.
- Internet GPRS, EDGE, 3G data connection (Not a WAP connection) on your mobile handset.
- Optional: WiFi connection.

Note: Currently it is not possible to make VoIP calls over 3G/GPRS networks.

Downloading fring via website

> To download fring from the web:

Open <http://www.fring.com> in your browser.

The following screen opens.

The screenshot shows the homepage of the fring website. At the top left is the fring logo with the tagline "It's fringing freedom!" and "BETA". To the right of the logo is a navigation menu with links: "fring is | download | community | fun | blogs | support". Below the navigation menu, the main content area features a central headline: "free mobile calls, live chat & presence over internet data plan or WiFi". To the left of this headline is an image of a mobile phone displaying the fring app interface. To the right is a green box with a yellow arrow pointing to it, containing the text "download fring to your mobile". Below the headline, there is a section titled "go mobile with" listing various services: "Skype®, MSN® Messenger, ICQ, Google Talk™, SIP, Twitter, AIM® & Yahoo!™". To the right of the main content are two sidebars. The first sidebar is titled "file transfer" and contains the text "Send and receive files with fring's new file transfer feature!" and a "learn more >>" link. The second sidebar is titled "fringcubator" and contains the text "fresh from the oven: Get your fringME! widget now." and a "learn more >>" link. At the bottom of the page, there is a footer with links: "about - newroom - partners - site map - legal". Below the footer is a copyright notice: "© 2005-2008 fringland Ltd. All rights reserved. fring, fringsterz, fring a friend and the fring logo are trademarks of fringland Ltd. Other trademarks are the trademarks of their respective owners. This product uses the Skype™ API but is not endorsed or certified by Skype. Legal agreements were updated on 5/2/2008".

Click the **download fring to your mobile** link (in the green box).

A screen with the following form opens.

to join fring, fill in your details

Handset type: [visual list]
 Your brand Your device

Your country:
 Choose your country

Mobile number: [what for?]
 phone number

Email address:

join >>

1. In the **Handset type** field, select the type of mobile handset that you have.

Note: fring is currently available only for the handsets listed in the drop-down box.

2. In the **Your country** field, select your country.

3. In the **Mobile number** field, type in the phone number of your handset.

Note: Enter your area code and phone number without any spaces. Type it carefully - your international number is your fring user-id.

4. In the **Email** field, type in your email address.

5. Click **join**.

The confirmation screen opens and an SMS is sent to your handset.

Once you have received the SMS, the installation and setup process continues on your handset.

On your handset: Open the SMS message and click the download link.

The following screen appears:

Server Connection Figure

6. Click **Yes** using your left soft key to begin the download process.

Within a few seconds, the handset accesses the website. fring is downloaded to your handset and you are ready to begin the installation process.

Downloading fring after receiving an SMS invitation from a friend

If you have received an SMS invitation to join fring, you can download the application easily.

> To download fring after receiving an SMS invitation

1. Press the download link in your SMS message.

The server connection figure (above) appears.

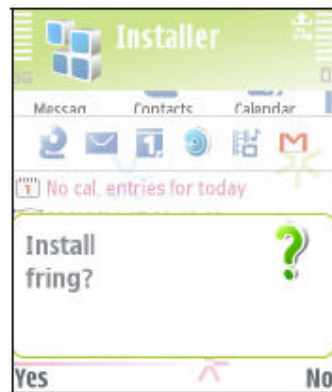

Note: If the link is not highlighted, enable the **automatic find on** feature available in the **Options** menu of your SMS message!

2. Press **Yes** using your left soft key to begin the download process.
fring is downloaded to your handset and you are ready to begin the installation process.

Installing fring

Before you can use fring, it needs to be installed on your handset. (For information about downloading fring, see the previous section in this guide.)

Once you have completed downloading fring, the following screen opens:

1. Press yes using your left soft key.

The following screen opens:

2. Press **Continue** using your left soft key.

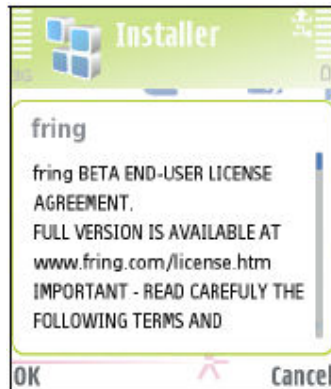

The following screen opens:

3. Select the location you would like to use and press **Select** using your left soft key.

Note: fring can be loaded into any available memory space.

4. The following screen opens:

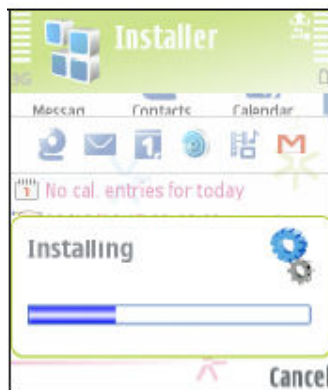

5. Before you can begin working with fring, read and accept the EU LA.

> **To read and accept the EULA:**

1. Use the down arrow to scroll through the EU LA.
2. Once you have read the EULA and agreed to the terms, press **OK** using your left soft key.
3. The full EULA is available on our website at www.fring.com/license.htm

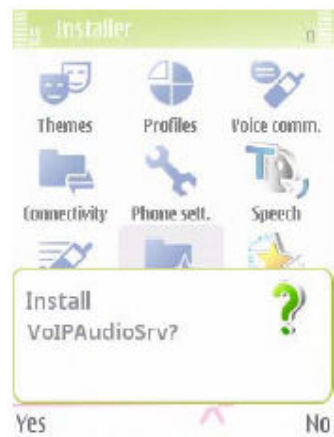

6. The installation process continues and the following screen appears.

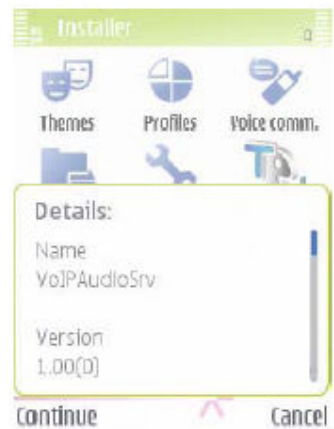

Once fring has been installed, the following screen appears:

Click 'OK' to continue. The following screen appears:

Click 'Yes' to continue. The following screen appears:

Click 'Continue' to install VoIPAudioSrv. Once you have finished installing VoIPAudioSrv the following screen appears:

7. If you **want** repeated notification of billable events, un-check the first box using your left soft key.

If you **do not want** that fring will auto start when you turn on your handset, un-check the second box using your left soft key.

Notes:

- > Your choice does not affect the fring installation.
- > During the installation process, the following screen may appear, indicating that the automatic access point detection did not find an active access point to access the internet:

If this screen appears, press **OK** using your left soft key.

The following screen opens.

8. Select your **3G/GPRS** or **WiFi** connection (and not your WAP connection).

Note: The specific access points may vary depending on your international location and carrier.

9. Once you've chosen your connection, the following screen will appear while fring checks its server for updated version:

Registering to fring

A short registration process is required before you can begin to use fring.

The stages of this process are:

- > Nickname and Password Selection
- > Service Definition

Selecting your fring nickname and password

Once the installation is complete, an **Installation Complete** message appears briefly. You are now ready to select your fring nickname and password.

The registration screen allows you to select your nickname and the password you will use to access your fring account. Your fring nickname will help your friends find you easily. A password is required to secure your account and to protect your fring contact list.

Note: The user-id used to identify your account is the **international phone number** of your handset. It cannot be changed. Your friends can search for you and contact you using this number.

> **To select your nickname:**

1. Use the keys on your handset to choose the nickname you want to use.
2. Use the down arrow on your handset to navigate to the next field.

> **To select your password:**

1. Use the keys on your handset to choose the password you want to use.

Note: Passwords must be at least 4 characters.

2. Press **Next** using your right soft key to move to the next screen.

The next screen allows you to add your **MundiCalls** account details. Once you have chosen your fring nickname and password, provide the details of your **MundiCalls** account so that you can begin making and receiving VoIP calls.

Note: If you do not already have a **MundiCalls** account, send an email to info@mundicalls.com and request for one.

Adding or Signing in to **MundiCalls** VoIP service.

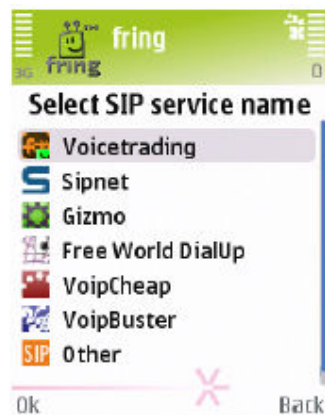

Follow the instructions below:

1. Navigate to the Add-ons Tab by pressing the right arrow on your handset.

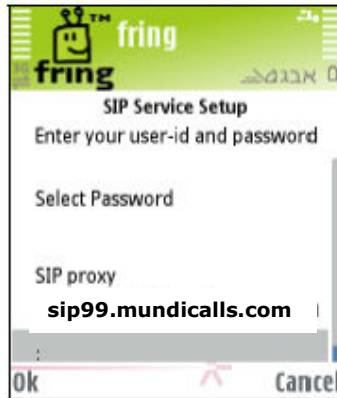

2. Navigate between the options using the up and down arrows on your handset. Choose **SIP** from the list (press your joystick in to select items in the list) and press **Next** using your right soft key.

The following screen appears:

3. Choose **MundiCalls** from the list. If **MundiCalls** is not listed, choose **Other**.

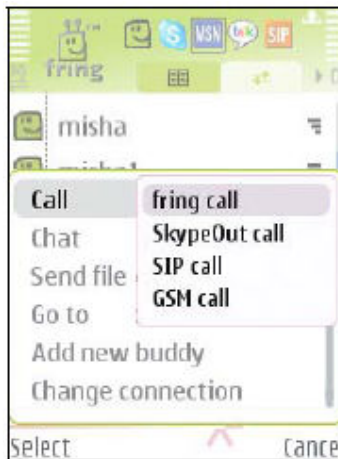

The following screen appears:

4. Enter your **MundiCalls user id** (same as IP phone number, i.e. 333xxxx) and **password** assigned to you when you applied for **MundiCalls** service.
5. Enter the **SIP proxy**: sip99.mundicalls.com
Press **OK** using your left soft key.

You should be logged into **MundiCalls** and now be able to make outgoing calls using your **MundiTravel Mobility** service.

Making a SIP call

From the Call submenu, choose **SIP call**. Your call will be made using the **MundiCalls** account you have added. **Start making MundiTravel calls.**

Remember to dial 1 + Area Code + Phone number for calls to USA and Canada and 011 + Country Code + City Code + Phone number for all other international destinations.
